

Flight Attendant Unimatic Screen Changes

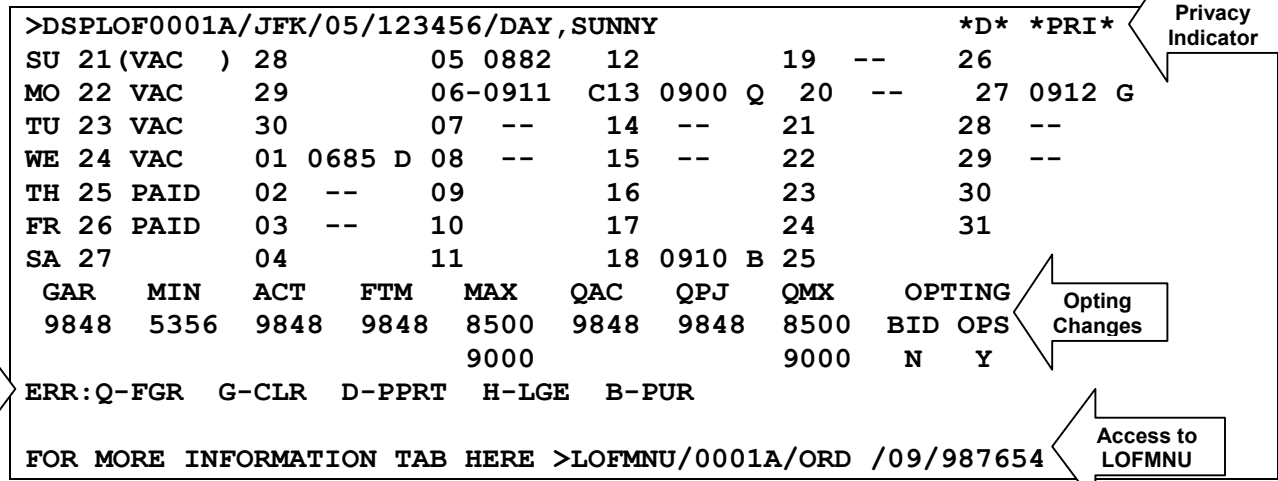

Effective Feb. 18, the DSPLOF screen will be modified and two new Unimatic displays introduced. These changes are a result of a compliance project with the Federal Aviation Administration (FAA). Here are the highlights:

DSPLOF

- DSPLOF will be modified to include a privacy (*PRI*) indicator based on selecting field three in the FDEM screen. When FDEM field three (3. NO OTHER FLIGHT ATTENDANTS SHOULD VIEW MY SCHEDULE) is selected, the privacy indicator will appear in top right corner of DSPLOF.
- The opting area will now indicate whether opting occurred during the bid process or during the operation (e.g., increase of time through open flying, flight attendant request, etc.).
- DSPLOF will now display up to six diagnostic codes. If more codes exist, a link to LOFDIG will be displayed. The screen will also display a message when no diagnostic errors exist.
- The CHGLOF line will no longer be displayed in the flight attendant view of DSPLOF.
- On the last line of DSPLOF, a new line of flying menu (LOFMNU) will always be accessible.

LOFMENU

LOFMENU contains links to frequently used and new line of flying screens. Once LOFMENU is displayed, just tab to the appropriate option and enter. The only new display on the menu is LOFTXN.

LOFTXN

Through LOFTXN (line of flying transactions), flight attendants can review basic or detailed line transaction information for the entire schedule month. This includes trade activity, reassignments, open flying and much more. To see more detailed information about a specific action, tab to ROLL-UP and scroll between the pages.
